COMPREHENSIVE INGREDIENT
PORTFOLIO

At D&D, our sourcing team plays an integral role in reducing formula cost and providing more value to our customers. We maintain a comprehensive range of ingredients – with more than 650 different ingredients in our inventory. Our team identifies and qualifies each supplier for best value as measured by quality, service, traceability, and price. All ingredients are inspected as they arrive at our facility for quality and safety.

- **Heat Treatment**

CUSTOM FORMULATION

The D&D formulation team understands ingredient characteristics, appropriate inclusion levels, and the necessary addition sequence to make a uniform mix. Formulation quality is an essential element of the nutrition, health, and wellness of every animal. We have experience manufacturing a variety of products including:

Vitamin Premixes
Mineral Premixes
Vitamin-Trace Mineral Premixes

Nutritional Health

Specialty Ingredient Blends

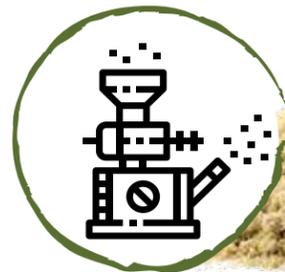

PREMIXING & BLENDING

D&D specializes in custom premixing for a wide range of clients in the feed and pet food industries. We can blend your private label product (from single batch quantities to large scale production runs) in precisely the right amount resulting in a uniform blend.

We manufacture custom premixes and blends for the following species:

- Dairy
- Swine
- Poultry
- Beef
- Pet
- Specialty

CUSTOM GRINDING

D&D's Accu-Grind™ system is all about precision. From whole grains to meals, our grinding facility has multiple hammer mills to create the right particle size to meet your needs. Our Accu-Grind system can mill the product into an ultrafine, fine, medium or coarse flour particle size.

CO-PACKING

We have multiple packing lines within our system. D&D can custom Co-Pack your private label product in any number of package types, from paper to poly bag or 2,000 lb. tote containers. We private label for feed, nutritional health product manufacturers, and pet food companies.

WAREHOUSING

When it comes to internal warehouse safety and quality control, D&D employs the highest standards. Our warehouse facilities include: 300,000 SF at our main campus, 63,000 SF at our Spencerville location, and an additional 100,000 SF at partner warehouses. Our facilities include fully segregated storage areas.

DISTRIBUTION & FULFILLMENT

D&D is a choice for many companies because of our in-house distribution capabilities and relationships within the industry. Our Delphos location allows us to quickly ship anywhere in the Tri-State area and surrounding states. D&D Trucking & Services maintains a fleet of 20 trucks and 75 trailers. We have the equipment customers need such as Hopper, Pneumatic, and Van trailers ranging from 48' to 53'.

TRANS-LOADING

We are located on the Chicago, Ft. Wayne and Eastern Railroad (CFE) and can transload virtually any commodity in a safe and efficient manner. D&D has the capability and necessary equipment for **railcar to truck** (hopper or pneumatic) and **tote to truck** trans-loading. Our commodity storage facilities (upright bins - 100 ton capacity each), warehouse, and van trailers provide the option of storing the commodity short-term or long-term for customer convenience.

HEAT-TREATMENT

Our all-natural dry heat process was designed and built on-site by D&D. By heat treating with dry heat, D&D's proprietary process provides a secure and safe solution for dry feed and pet food ingredients. Our process allows for customization and safe handling because our specially designed system keeps your ingredients in the original package. This ensures product integrity and prevents any cross-contamination.

QUALITY ASSURANCE

Quality is an integral part of D&D's business principles. These principles guide our actions to deliver quality products and unsurpassed service. We are committed to providing feed and pet food ingredients that are safe, contribute premium value to our customers, and meet all regulatory requirements.

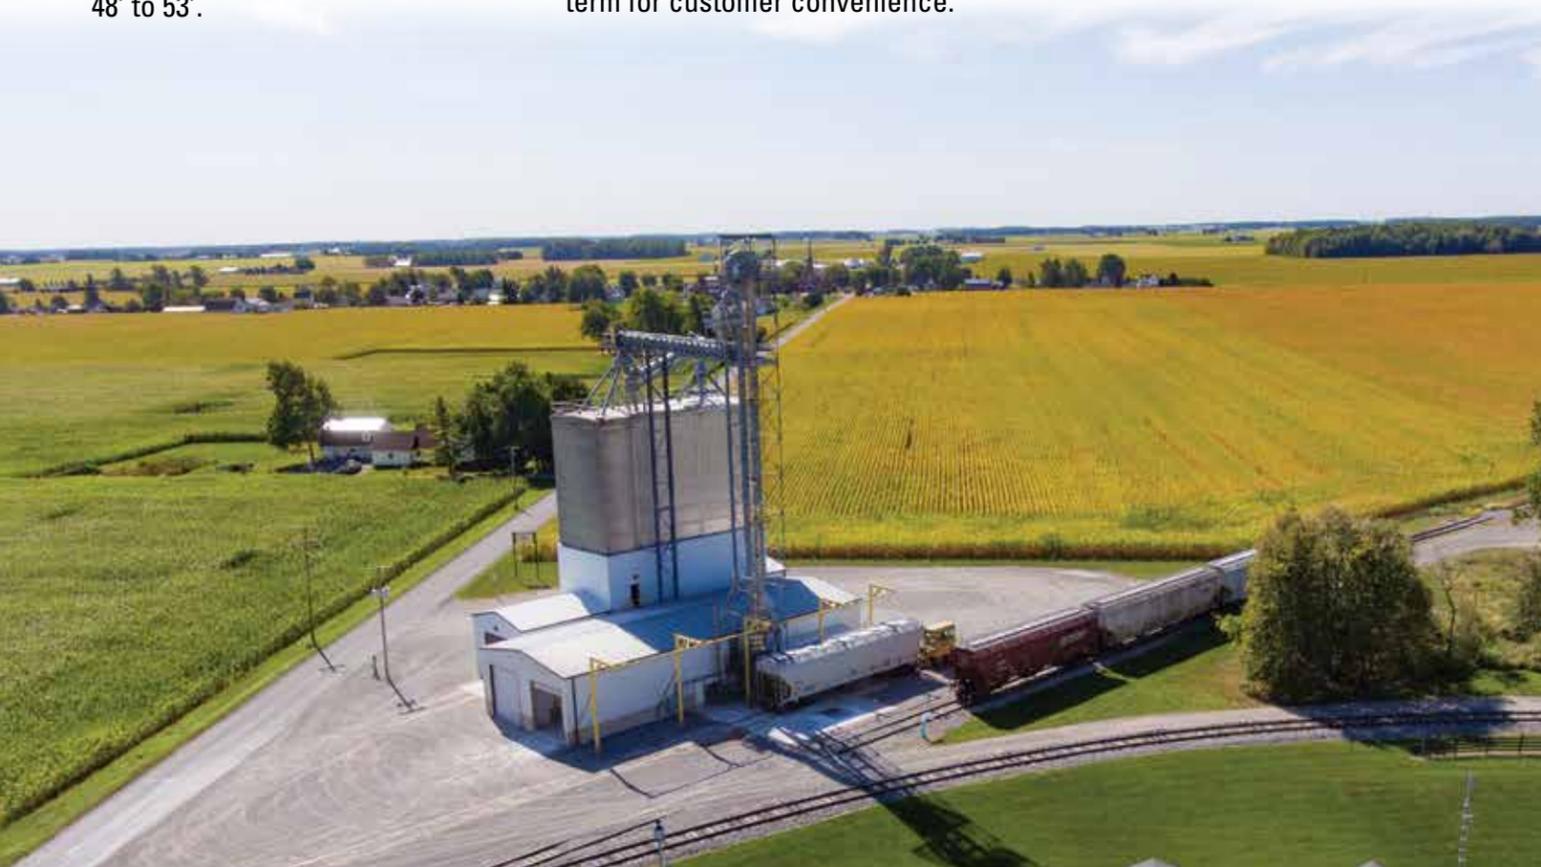

From supplier approval through grinding, blending, packaging, and shipping of finished material, numerous precautions and quality checks are in place to ensure we provide a safe, quality product.

Our Quality Assurance program includes the following:

- Supplier approval program to validate supplier and ensure quality
- Traceability program from receipt from supplier to end user
- 10 trained Preventive Controls Qualified Individuals (PCQIs) on-site from top management through Department Supervisors
- Feed safety management and quality management systems audited by third party certification bodies
- Ongoing training programs

We hold the following certifications:

CUSTOMER SERVICE

When you work with D&D, you'll experience something original and very unique. You'll find a team of diverse talents working across many markets and customer types, keeping one goal in mind – "to provide the ultimate in customer service." Since 1976, D&D has combined quality feed ingredients and best-in-class outsource manufacturing services to help leading feed and pet food companies be their very best. Our comprehensive manufacturing capabilities deliver quality solutions, while providing you the freedom to fulfill your growth strategies. We're more than just a manufacturer...we believe in building long-term relationships with our customers. Getting it right is part of getting it done!
